

MANNOL O.E.M. ATF SP-IV 8219

Special low viscosity synthetic gear oil (ATF) with a special additive package for Hyundai 6-speed automatic transmissions. Designed based on the requirements of Korean automakers.

Product properties:

- A low-viscosity synthetic base of the highest quality with a consistently high viscosity index in combination with a multifunctional additive package retains all its properties in a wide temperature range: it provides good lubricating properties at low (-45°C) temperatures in winter and provides a stable oil film at extreme loads and temperatures in the summer, it provides the necessary anti-friction properties even in case of violation of the continuity of the oil film under heavy loads. Protects friction surfaces from wear and sticking, reduces friction energy losses;
- A high-tech combination of additives provides good anti-friction properties for gearing and excellent frictional properties for friction elements, which ensures significant fuel economy, exceptionally soft and smooth gearshifts without jerking and a significant increase in the service life of all transmission elements;
- Provides smooth and reliable operation of the clutches, extends the service life of friction elements, prevents slipping of the contacting elements of the torque converter when switching modes, which significantly reduces their wear;
- It has unsurpassed thermal oxidative and chemical stability and resistance to high-temperature thermal degradation over the entire life cycle. This allows to minimize the formation of sludge, varnish, soot and other carbon deposits, significantly increase the oil change interval and ensure the durability of transmission parts, which reduces the cost of maintenance;
- Protects metal parts from ferrous and non-ferrous alloys from corrosion both during operation and inoperative;
- Effectively resists aeration and foaming;
- Provides compatibility with all materials of seals, prevents their swelling, hardening and shrinkage, which reduces the cost of spare parts and prevents leaks;
- Well removes heat from rubbing surfaces;
- Reduces noise.

It is recommended for automatic transmissions of HYUNDAI, KIA of the latest generation where compliance with the above requirements is required, as well as for automatic transmissions of cars and commercial vehicles of European manufacturers in accordance with the above specifications. Suitable for gearboxes of Proton and Chery cars.

Color: red.

Follow the manufacturer's instructions in the instruction manual!
